Our Services

For Governments & Operators

Our Transit Management Solution and Driver Console Units are both cost effective and comprehensive.

Our ecosystem contains a range of operational capabilities including: Account Based Smartcard solution and Smart Ticketing, Real Time GPS Tracking & Route Guidance, Data Upload abilities, Contractual Reporting Vehicle Maintenance System, Shifts, Rosters & Charter System, Driver Compliance, Push to Talk, Electronic Work Diary, Student Management, Driver & Vehicle Handbooks and more.

For Schools

Our solution enables schools to track student buses, reconcile payments with Smartcards, create electronic student manifests, and send live alerts to parents and schools. It's a versatile tool for managing student transportation needs, including regular travel, excursions, and other events.

For Passengers

The Transportme Passenger App offers a range of unique features, including free bus tracking, live alerts for boarding and de-boarding patterns, and push notifications for delayed buses and alerts. Notably, it also allows users to conveniently manage their Smartcards directly from the app.

transportme ™

Transport*me* is the leading **Transit Management Solution** used in the Australian Bus Industry, trusted by Governments, Bus Operators, and Schools alike.

Multiple state governments have contracted the **TME** solution, now utilised by over 1000 bus companies and schools since 2013.

TME is an Australian technology company that offers an innovative and cost-effective **Transit Management Solution (TMS)** comprising of an **Operator Portal (OP), Driver Console Unit (DCU)** and **Passenger Application (PA)**, as well as a suite of products that provide solutions for metro and regional public passenger and school transport services operated by private bus operators, educational institutions and government agencies across Australia, New Zealand and the South Pacific.

Founded in 2013 and operated by a team of bus industry experts, **TME** has a deep, unique understanding of the bus market. Our solutions and operational support model provide operators with the tools to meet their contractual requirements, while improving operational efficiency, unlocking enhanced safety and assurance features for passengers and students.
